

## WHAT IS NUMBER MAZE?

- Number Maze is a maze game inspired by Pacman.
- Game characters are numbers (1-9).
- Human player is represented by a magenta number.
- Computer controls other numbers.
- The aim of the game is reaching the highest score by collecting and matching the computer numbers.

## HOW TO PLAY NUMBER MAZE?

- The number maze game is very easy to play.
- You can move the human player number with the arrow keys.
- You put the numbers you collected in your right and left backpacks.
- You can use the Q and W keys to swap the numbers you collect on the right and left backpacks between the backpacks.
- You can earn points by matching the numbers you collect in the backpacks using the P key.

## NUMBER MAZE

## RULES OF NUMBER MAZE

- Green numbers: 1, 2, 3. These numbers do not move.
- Yellow numbers: 4, 5, 6. These numbers move randomly.
- Red numbers: 7, 8, 9. These numbers do path finding to reach the magenta number.
- Red numbers targeted path will be marked in the game area.
- If computer number is greater than the human number, human player dies
- If computer number is less or equal than the human number, human player collects the computer number.
